Response to Amendment

1. The amendment filed May 14, 2004, has been entered and made of record.
Claims 1-9 and 14-35 are cancelled. Claims 10-13 and 36-43 are pending.
The rejections of claims 1-4, 6, 7, 9, 14-19, 21-24 and 26-35 are rendered moot by their cancellation.

Claim Rejections - 35 USC § 112

2. Claims 36-39 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Claim 36 is a single means claim, and is therefore subject to an undue breadth rejection. See MPEP 2164.08(a). The single means is the "processor" ("processor" being broadly interpreted as anything that processes). Although the claim mentions an "audio/visual capture device," the wording of the claim does not require this device in combination with the processor. To avoid this rejection, it is suggested that the claim be reworded to indicate that the "device for presenting information to an audience" also comprises the "audio/visual capture device."

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 40-43 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

It appears that claim 40 (and claims 41-43 depending therefrom) was intended to be drawn to a "computer program product" type of claim. However, the wording is so broad that it is not restricted to a "computer program product." For example, a "program segment stored on a machine readable medium" with the "program portions" limitations only indicating intended use (i.e., not creating functional interrelationships with the computer) could be broadly interpreted to define a program listing on a sheet of paper (i.e., it could be read by a machine using optical character recognition). In this situation, the invention would be considered as non-functional descriptive material. To avoid this rejection, it is suggested that claim be reworded as follows: 1) The claim drawn to a computer program product comprising a computer readable medium (or similar language), 2) that a computer program (or program segment, etc.) is stored on the medium, 3) that the program causes the computer to control a presentation of information to an audience, 4) and that the program comprises the recited program portions.

Allowable Subject Matter

5. Claims 10-13 are allowed.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
